Applied chemistry	exchange	Doctorate	13.3	Research topics are related with the development of new advanced technologies (nanosciences, biosciences, technologies in environmental protection), development of biosensors for medical applications, synthesis of compounds with anticancer and antiviral activities, ceramic and polymeric composite materials, and catalysts.	By 2014-12-31	12	MSc. in chemistry; to be enrolled in PhD program at home university	Passport, CV, Transcripts, Last Qualification Certificate, Motivation, Language Proficiency Evidence, Research Proposal	EN
Transport and Traffic Studies	exchange	Doctorate	02.6	research fields: Transport and Traffic Engineering, Urban Transport and Traffic, Inter-modal Transport and Traffic, and Transport Logistics and Management.	By 2014-12-31	10	MSc in Technical Sciences; to be enrolled in Phd program in traffic sciences at home university	Passport, CV, Transcripts, Last Qualification Certificate, Motivation, Language Proficiency Evidence, Research Proposal	EN/HR
Philosophy	exchange	Doctorate	08.1	Postgraduate doctoral study in philosophy provides systematic education of future philosophers capable of understanding and creating new scientific knowledge. The doctoral study programme is similar in structure to doctoral programs at the most prestigious foreign universities whereas its individual courses syllabi reflect the most recent scholarly achievements in the field of philosophy. Required literature for particular courses is predominantly in foreign languages (usually English) which increases the accessibility of the programme to potential foreign students. PhD Biology/Molecular Biology/Genetics/Physiology	degree	Doctorate	13.8	Drought, salinity, extreme temperatures, heavy metals and other xenobiotics are the major abiotic stresses that adversely affect plant growth and productivity and are often interrelated with oxidative stress; these conditions singularly or in combination induce cellular damage. To cope with abiotic stresses, of extreme significance is to understand plant responses to abiotic stresses that disturb the homeostatic equilibrium at cellular and molecular level in order to identify a mechanism for stress tolerance. The aim of our work is to determine existence of novel proteins involved in the process of tolerance to heavy metal stress.
